Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2011, the Altamira Health Sciences Fund Investor Series units returned 9.54% compared to 9.72% for the Fund's benchmark, the MSCI World Health Care Index (CA\$). Unlike the Index, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for returns of the Advisor Series. Returns of the Advisor Series may vary mainly because of fees and expenses.

Global equities swung in both directions during the first half of the year, rising early on expectations of a global economic and earnings recovery but pressured lower later by a number of factors that included political unrest in the Middle East and North Africa, a triple disaster (earthquake, tsunami and nuclear meltdown) in Japan and last but not least, an increased probability of defaults in Europe.

After rising during January and February, stocks sunk deep into the red during March, following the Tohoku earthquake in Japan. However, most global stock indices managed to rally back from oversold levels during April, as investors became convinced that the quake's impact on the global supply chain will be limited. Late in the period, uncertainty related to European debt seeped back into the markets temporarily, but lifted shortly thereafter, following the adoption of austerity measures in Greece that led to a relief rally that sent most indices to end the period higher.

During this time, the global Health Care sector benefited from the increased market and economic uncertainty, given its defensive nature and posted the best performance that exceeded the next best performer, Energy, by over 330 bps in terms of relative performance. The broad-based outperformance of the sector over the first half of 2011 had a marked positive impact on the Fund's 6-months performance. On a country basis, the salient features in terms of weight and performance are as follows:

The Fund and its underlying sectors enjoyed a strong performance during the first half of 2011, which was triggered by a new bout of risk aversion. Areas that added the most value to the Fund's return included, a significant underweight in Switzerland which contributed 2.05% of value and a notable overweight in Israel, which returned +28% versus the benchmark return of -3%.

Recent Developments

In April 2011, Mr. Serge Dépatie left Natcan and the Fund's management responsibility was transferred to Mr. Lambros Piscopos and Mr. Markus Kobler.

Most world economies are currently experiencing an economic soft patch. Should this situation prove transitional, the portfolio manager stands ready to increase the Fund's exposure to higher beta (riskier) companies, in order to allow it to outperform.

Going into the second half of 2011, the Fund is significantly overweight in North America, especially in the U.S. and a commensurate underweight in Europe. More specifically, the Fund is underweight in Switzerland and the U.K. and is overweight in Canada and Israel.

Going forward, the portfolio manager believes that developments relating to the situation in Europe, the potential of a Chinese economic slowdown coupled with an unstable employment situation and housing market in the U.S. could have an impact on the value of the Fund. As such, the Fund will remain focused on investing in strong businesses, on the belief that superior companies that have above average fundamentals will outperform over the long term. Should investors outlook become more sanguine (due to strong earnings and improved economic outlook) with regard to a global resurgence in activity, the Fund may temporarily lag during this brief period of consolidation.

Future Accounting Standards

In February 2008, the Canadian Accounting Standards Board ("AcSB") confirmed that all publicly accountable enterprises would be required to report under International Financial Reporting Standards ("IFRS") as published by the International Accounting Standards Board ("IASB") for fiscal years beginning on or after January 1, 2011. However, in January 2011, the AcSB approved a deferral of the effective date of entry in force of IFRS from January 1, 2011 to January 1, 2013 for investment companies that are currently applying Accounting Guideline AcG-18, "Investment Companies".

The deferral of the transition date to IFRS has been put in place to ensure that investment companies will not have to modify their actual accounting treatment for entities in which they have control while the IASB is completing the standard about investment companies.

Consequently, the Funds will publish their first audited financial statements in accordance with IFRS for the year ended December 31, 2013 and will present comparative figures in accordance with IFRS for the year ended December 31, 2012, including an opening balance sheet as at January 1, 2012.

Given the deferral of the effective transition date to IFRS, management is closely monitoring the evolution of the standards and is adjusting its project consequently. In the periods preceding the first fiscal year in which IFRS will be adopted, the impact of transitioning to IFRS on the financial statements of the Funds will be disclosed as they become known.

Related Party Transactions

National Bank of Canada (“the Bank”) and its affiliated companies’ roles and responsibilities related to the Fund are as follows:

Trustee

Natcan Trust Company (“NTC”), a wholly owned subsidiary of the Bank, is the Fund’s trustee. In this capacity, it is the legal owner of the Fund’s investments.

Fund Manager

The Fund is managed by National Bank Securities Inc. (“NBS”), which is a wholly-owned subsidiary of the Bank. Therefore, NBS provides or ensures the provision of all general management and administrative services required by the Fund’s current operations, including investment consulting, the arrangement of brokerage contracts for the purchase and sale of the investment portfolio, bookkeeping and other administrative services required by the Fund.

The Fund reimbursed the Fund Manager for operating expenses, at cost, incurred in administering the Fund, including trustee, record-keeping, custodial, legal, audit, investor servicing, and securityholder reporting fees.

As described under the heading Management Fees, the Fund pays annual management fees to NBS as consideration for its services.

Portfolio Advisor

Management of the Fund’s portfolio has been delegated by NBS to Natcan Investment Management Inc. (“Natcan”), a corporation of which the Bank is the majority shareholder. In that capacity, Natcan provides the Fund with portfolio management services, including trading, carrying out transactions and brokerage services. The fees payable to Natcan are calculated by applying a percentage to the average net asset value under management for each month.

Performance fees may be payable by NBS if the performance criteria set for certain National Bank Funds are met.

Distribution of Fund Units

NBS acts as Distributor for the Fund. In this capacity, NBS buys, sells and swaps securities through Bank branches and the National Bank Securities Advisory Service in Canadian provinces and territories, and through external registered representatives. Fund units are also offered by National Bank Direct Brokerage Inc., CABN Investments Inc. National Bank Financial Inc. and other affiliated entities. Each month, brokers receive a commission representing a percentage of the average daily value of the securities held by their clients.

Transfer Agent and Custodian

NTC acts as registrar for the Fund’s securities and the names of unitholders. NTC also acts as the Fund’s custodian. The fees for NTC’s custodial services are based on the standard rates in effect at NTC.

Brokerage Fees

The Fund may pay broker’s commissions at market rates to a corporation affiliated with NBS. The brokerage fees paid by the Fund for the period are as follows:

	Period ended June 30, 2011
Total brokerage fees	\$17,065.00
Brokerage paid to National Bank Financial	\$ –

Securities of related issuers, underwriting between related parties, transactions between funds and main trading activities between related parties

The Fund followed the standing instructions of its Independent Review Committee, which approved the following related party transactions:

- Purchasing or holding the securities of a related issuer, in particular, those of National Bank of Canada;
- Investing in the securities of an issuer when an entity related to the manager acts as an underwriter for the placement or at any time during the 60-day period after the end of the placement;
- Purchasing or selling securities to another investment fund managed by the manager or a company in the same group;
- Purchasing or selling debt securities on the secondary market, through related brokers that are main brokers in the Canadian debt securities market (in accordance with an exemption received from the Canadian Securities Administrators).

The manager has implemented policies and procedures to make sure that the conditions applicable to each of the above transactions are met. The applicable standing instructions require that these transactions be carried out in accordance with National Bank Securities policies, which specify, in particular, that investment decisions pertaining to these related party transactions must be made free from any influence by an entity related to National Bank Securities and without taking into account any consideration relevant to an entity related to National Bank Securities.

Furthermore, the investment decisions must represent the business judgment of the securities advisor, uninfluenced by considerations other than the best interest of the Fund and must achieve a fair and reasonable result for the Fund.

Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

Administrative and Operating Services

The Bank provides the Fund with certain services, including accounting, reporting and portfolio valuation services. The costs incurred for these services are paid by the manager to the Bank.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period ended June 30, 2011 and the past five years.

⁽¹⁾ This information is provided as at June 30, 2011 and December 31 of years shown.

⁽²⁾ Management expense ratio is based on total expenses for the period indicated (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of the daily average net asset value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

⁽⁴⁾ The Fund's portfolio's turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund pays annual management fees to the Manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. A portion of the management fees paid by the Fund covers trailer fees and sales commissions paid to brokers. The remainder of the management fees primarily cover investment management and general administration services. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

Series		Management Fee	Distribution	Others [†]
Investor Series		2.25%	11.11%	88.89%
Advisor Series*	Front end	2.25%	22.22%	77.78%
	Back end		55.56%	44.44%
	Low-Load 1 to 3 years 4 years plus		22.22%	77.78%
			44.44%	55.56%

^(†) Excluding sales commissions paid on the Advisor Series with low load and back end fees, which are not paid for out of the management fees.

^(*) Includes all costs related to management, investment advisory services, general administration and profit.

Past Performance

Information on the Fund's past performance is presented in the graphs below. The graphs assume that fund distributions during the periods presented were reinvested in full in additional fund securities and do not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a Fund or series of a Fund does not necessarily indicate how it will perform in the future.

Annual Returns

The following bar chart shows the Fund's annual performance in each of the last years shown and illustrates how the Fund's performance has changed from year to year. It shows in percentage terms how an investment made on January 1 would have increased or decreased by December 31 for each year.

¹ Returns for the period from June 12, 2009 (inception date) to December 31, 2009.

² Returns for the period from January 1, 2011 to June 30, 2011.

Notes on forward-looking statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.
