

**MARKET-LINKED GUARANTEED INVESTMENT CERTIFICATE (the market-linked GICs) INFORMATION STATEMENT
DATED APRIL 18, 2019**

Before purchasing a market-linked GIC, prospective investors should determine whether this product corresponds to their investment objectives. The Bank has issued previous series which may have different terms and conditions. Please read this document and take it into consideration when making your decision.

INVESTMENT HIGHLIGHTS

Issuer:	National Bank of Canada (the “Bank”)
Product Code (Fundserv):	NBC10021
Issue Date:	June 12, 2019
Maturity Date:	June 11, 2024
Term:	5 years
Minimum Investment:	\$500
Eligible for CDIC Coverage:	Yes, subject to maximum CDIC coverage limitations and applicable conditions.
Sale back to the Bank:	You will be able to sell your Diversified GIC - Stability back to the Bank as provided herein. To this end, the Bank has appointed National Bank Financial Inc. as its agent to maintain on a daily basis until the last valuation date a Bid Price (as defined herein) for the Diversified GIC - Stability and to purchase such Diversified GIC - Stability on behalf of the Bank for resale to the Bank and cancellation. See “Transfers; No Secondary Market; Sale of the Market-Linked GIC to the Bank”.
Secondary Market:	No secondary market. The Diversified GIC - Stability will not be listed on any stock exchange and no secondary market will be provided.
Transfers:	The Diversified GIC - Stability will not be transferable to other investors prior to maturity.
Dividends Reinvested:	No. The Reference Portfolio Return is a price return.
Guaranteed Interest at maturity:	7.47%, equal to an annually compounded rate of approximately 1.45%.
Maximum Interest at maturity:	23.22% over the term of the Diversified GIC – Stability, including the Guaranteed Interest.

CONDITIONS SPECIFIC TO THE INVESTMENT
Diversified GIC – Stability Flex Series, Series 6 (the “Diversified GIC – Stability”)

The initial principal amount will be invested on the Issue Date (the “principal invested on the Issue Date”). Investors of the Diversified GIC – Stability will be entitled to receive on the Maturity Date repayment of the principal invested on the Issue Date. In addition, depending on the performance of the Reference Portfolio which is a notional portfolio composed of Reference Assets, investors will be entitled to receive a Variable Interest including the Guaranteed Interest. The Maturity Date will be five years (less one business day) following the Issue Date. Assuming an Issue Date on June 12, 2019, the Maturity Date will be June 11, 2024. Payment of the principal invested and any Variable Interest will be made on the first Business Day immediately following the Maturity Date.

The variable interest (the “Variable Interest”) payment, if any, is calculated as follows:

$$\text{The Variable Interest} = \text{Principal invested on the Issue Date} \times \text{Reference Portfolio Return.}$$

The Variable Interest will be no less than 7.47% of the principal invested on the Issue Date (the “Guaranteed Interest”) (which is equivalent to a compounded annual rate of return of approximately 1.45%) and will be limited to a maximum of 23.22% of the principal invested on the Issue Date (the “Maximum Interest”), which would be the equivalent of a compounded annual rate of return of approximately 4.26%.

The Variable Interest on the Diversified GIC – Stability is based on the return of the following three reference assets (the “Reference Assets”) set forth in the following reference portfolio (the “Reference Portfolio”):

Reference Assets	Reference Asset Weight
NBC Conventional fixed-rate GIC (the “Fixed-rate GIC”)	65%
Canadian Precision 10 GIC (the “Canadian Precision 10”)	20%
Global Precision 10 GIC (the “Global Precision 10”)	15%

The Reference Portfolio Return is equal to the weighted average return of the Reference Assets calculated as the sum of the Weighted Reference Asset Return of the Reference Assets comprising the Reference Portfolio.

Where: the Weighted Reference Asset Return means for each Reference Asset contained in the Reference Portfolio and on any day, the product of (i) the Reference Asset Return and (ii) the Reference Asset Weight of such Reference Asset as specified in the table above.

In order for the Diversified GIC – Stability to pay the Maximum Interest at maturity, the Reference Asset Return of each of the Canadian Precision 10 and the Global Precision 10 must be equal to or above their maximum Reference Asset Return of 45.00%, which is equivalent to a compound annual rate of return of approximately 7.71%. Conversely, with respect to the calculation of the Reference Portfolio Return, the minimum Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 will be fixed at 0% even when the actual Reference Asset Return of the Canadian Precision 10 or the Global Precision 10 is negative.

Fixed-rate GIC

The return on the Fixed-rate GIC is based on the return of the non-redeemable 5-year conventional fixed-rate GIC issued by the National Bank of Canada.

More specifically, the Reference Asset Return of the Fixed-rate GIC is a percentage (rounded to two decimal places) equal to 2.20%. The Reference Asset Return of the Fixed-rate GIC is compounded annually over five years.

The Fixed-rate GIC will be used solely as a notional reference asset for the purpose of calculating the Variable Interest. No actual funds will be invested in the purchase of the Fixed-rate GIC. Investors will not be the owners of, or have any rights or interest in or to, the Fixed-rate GIC.

Canadian Precision 10 and Global Precision 10

The return on the Canadian Precision 10 is based on the price return of the common shares of 20 Canadian companies (the “Reference Shares of the Canadian Precision 10”) comprised in the following reference basket (the “Reference Basket of the Canadian Precision 10”):

Reference Shares of the Canadian Precision 10	Primary Exchange*	Sector	Ticker symbol
Barrick Gold Corporation	Toronto	Materials	ABX
BCE Inc.	Toronto	Telecommunication Services	BCE
Bank of Montreal	Toronto	Financial Services	BMO
Cameco Corporation	Toronto	Energy	CCO
Canadian Imperial Bank of Commerce	Toronto	Financial Services	CM
Canadian National Railway Company	Toronto	Industrials	CNR
Enbridge Inc.	Toronto	Energy	ENB
Fortis Inc.	Toronto	Utilities	FTS

Australia	5%

None of the entities comprising the Reference Baskets have had any involvement with respect to the Diversified GIC – Stability or the preparation of this document and such entities do not assume any responsibility or liability in respect of the Diversified GIC – Stability, and further, they make no representation as to the soundness of the purchasing of the Diversified GIC – Stability. The Diversified GIC – Stability is not sponsored, endorsed or promoted by any of these entities. All information included in this document with respect to publicly traded securities and the issuer of those securities is taken solely from information published by that issuer or by the providers of the Reference Shares or other publicly available information. The Bank and its affiliates have not reviewed the public information disseminated by these entities and assume no liability in respect of the accuracy and completeness of information disseminated by such entities.

For each of the Canadian Precision 10 and the Global Precision 10, the Reference Asset Return is the arithmetic average (expressed as a percentage and rounded to two decimal places) of the price return of the 10 Reference Shares of the applicable Reference Basket having the sixth to fifteenth highest return of the 20 Reference Shares of the applicable Reference Basket (the “ten middle performing Reference Shares”) over the period starting on the Issue Date of the Diversified GIC – Stability and ending on the Valuation Date, subject to a maximum of 45.00% and a minimum of 0%. For greater certainty, when calculating the Reference Asset Return, each of the five Reference Shares of the applicable Reference Basket with the highest return (the “top five performing Reference Shares”) and each of the five Reference Shares of the same Reference Basket with the lowest return (the “bottom five performing Reference Shares”) will be ignored. In an effort to reduce the Reference Asset Return’s volatility, each of the Canadian Precision 10 and the Global Precision 10 will target the ten middle performing Reference Shares of their respective Reference Basket of 20 Reference Shares.

The return of each of the Reference Shares will be that of the Reference Share’s percentage gain or loss measured from its closing price on the Issue Date, to its closing price on the Valuation Date. The Valuation Date will be (subject to certain exceptions) the fifth Business Day preceding the Maturity Date. Although the return of the Reference Shares of the Global Precision 10 will be calculated in various foreign currencies, the foreign exchange rate between the Canadian dollar and such foreign currencies will not have any impact on the return of the Reference Shares of the Global Precision 10 for the purposes of the Diversified GIC - Stability as the return of each of these Reference Shares will be the return calculated in its foreign currency, without any conversion back to Canadian dollars.

The two Reference Baskets are used solely as a notional reference for the purpose of calculating the Reference Asset Return of the Canadian Precision 10 and the Global Precision 10, and therefore, the Variable Interest. No actual funds will be invested in the purchase of the Canadian Precision 10 and the Global Precision 10 or the Reference Shares, investors will not be the owners of, or have any rights or interest in or to, the Canadian Precision 10 and the Global Precision 10 or the Reference Shares. The Reference Asset Return will not reflect the payment of ordinary dividends in respect of the Reference Shares in the two Reference Baskets since the Reference Asset Return calculation is based on the price return of each of the Reference Shares and will not take into account dividends paid on such shares.

As of April 5, 2019, the dividends paid on account of all of the Reference Shares in the Reference Basket of the Canadian Precision 10 represented an annual return of approximately 3.44%.

As of April 5, 2019, the dividends paid on account of all of the Reference Shares in the Reference Basket of the Global Precision 10 represented an annual return of approximately 4.20%.

The return of each Reference Share will be equal to a number, expressed as a percentage, determined as per the following formula:

$$\frac{\text{Reference Share Final Value} - \text{Reference Share Initial Value}}{\text{Reference Share Initial Value}}$$

WHERE:

- **“Reference Share Initial Value”** will be equal to the Reference Share Price on the Issue Date.
- **“Reference Share Final Value”** will be equal to the Reference Share Price on the Valuation Date (i.e. the fifth Business Day preceding the Maturity Date).
- **“Reference Share Price”** means, on any day, the closing price of a Reference Share on the primary exchange on which the Reference Share is traded, as reported by such exchange, provided that if the primary exchange on which a particular Reference Share is traded is not open for trading on that day, if there is no closing price on that day or if there is a market disruption event affecting such Reference Share on that day, the closing price on the immediately preceding day on which such exchange is open for trading (and for which there is a closing price and no market disruption event) except if this occurs on the Issue Date or the Valuation Date, in which case the closing price on the immediately following day on which such exchange is open for trading (and for which there is a closing price and no market disruption event) will be used, up to a maximum postponement of five Business Days. If the closing of the primary exchange, the absence of a closing price or the market disruption event should last for five Business Days, the closing price of the relevant Reference Share will be a price determined on such fifth Business Day by the Calculation Agent in its sole discretion and in good faith using market-accepted practices.

Adjustments to the Reference Baskets

In certain cases, it may be necessary for the Calculation Agent to adjust any of the Reference Basket and calculations to be made under the Diversified GIC – Stability. Examples of such situations are provided below.

In the event of a Potential Adjustment Event in respect of a Reference Share, the Calculation Agent will determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the relevant Reference Share and, if so, may (i) make the corresponding adjustments, if any, to any one or more of the Reference Share Initial Value, the Reference Asset Return, or any other component or variable relevant to the determination of a Reference Share Price as the Calculation Agent determines appropriate to account for the diluting or concentrative effect and (ii) determine the effective date of the adjustments. A “Potential Adjustment Event” means, as determined by the Calculation Agent acting in good faith, any event that may have a diluting or concentrative effect on the theoretical value of the relevant Reference Shares, including a subdivision, consolidation or reclassification of the Reference Shares, an extraordinary dividend and shareholder right distribution.

Moreover, on or after the closing of a Merger Event, the Calculation Agent may either (i) (A) make adjustment(s), if any, to any one or more of the Reference Share Initial Value, the Reference Asset Return, or any other component or variable relevant to the determination of the Variable Interest as the Calculation Agent determines appropriate to account for the economic effect on the Diversified GIC – Stability of the relevant Merger Event and (B) determine the effective date of the adjustments, or (ii) if the Calculation Agent determines that no adjustments that it could make under (i) will produce a commercially reasonable result, the Calculation Agent may replace the affected Reference Share as set forth below. A “Merger Event” means any transaction such as a consolidation, amalgamation, merger, binding unit exchange, take-over bid or similar transaction involving a Reference Share or the issuer thereof which happens on or before the date on which the return of the Reference Share is to be determined.

In the event that an entity included in a Reference Basket becomes insolvent or files for bankruptcy or similar insolvency proceedings before the Maturity Date, the Calculation Agent will attribute a nil value to the common shares of that entity. If an entity in a Reference Basket is delisted or in the event of any other special circumstances that would affect its inclusion in the Reference Portfolio, the Calculation Agent may decide to replace it. In such a case, the Calculation Agent will try to replace it with an entity of similar size, sector of activity, and geographic area, or as it deems appropriate under the circumstances.

Before the Issue Date, the Bank may replace a maximum of two Reference Shares per Reference Basket, if certain material events, financial or otherwise, occur in respect of such Reference Share that the Bank may consider, at its sole discretion, to be detrimental to the interest of investors in the Diversified GIC – Stability. Any replacement Reference Share selected for replacement shall be of an issuer of a similar size operating in a similar industry. The Bank is not in the obligation to replace a Reference Share even if certain material events detrimental to the investor occur in respect of such Reference Share.

In all cases, the Calculation Agent will make all appropriate decisions and adjustments in the best interest of investors.

General

No interest or any other amount will be paid during the term of the Diversified GIC – Stability. Notwithstanding whether the Reference Portfolio Return is positive or not at maturity, the Diversified GIC – Stability will generate the Guaranteed Interest. However, if the Reference Portfolio Return is not greater than 7.47%, the Diversified GIC – Stability will generate only the Guaranteed Interest in addition to the principal invested on the Issue Date.

Notwithstanding the Fixed-rate GIC, the Diversified GIC – Stability is not a conventional fixed income investment, as it does not provide investors with a defined income stream or a return that can be calculated by reference to a fixed or floating rate of interest that is determinable in advance (except for the Guaranteed Interest). The following tables demonstrate the hypothetical performance of a conventional fixed-rate GIC compared to the potential performance of the Diversified GIC – Stability. These tables are included for illustration purposes only, the rates used for the fixed-rate GICs are hypothetical. No assurance can be given that the Diversified GIC – Stability will generate the Maximum Interest and each product is subject to its own features.

	Hypothetical conventional fixed-rate GICs			Diversified GIC – Stability	
	2%	3%	4%	Minimum Variable Interest at maturity (Guaranteed Interest)	Maximum Interest at maturity
Annual interest	2%	3%	4%	1.45%	4.26%
Compound interest at maturity (5 years)	10.41%	15.93%	21.67%	7.47%	23.22%
Compound interest at maturity on a \$1,000 investment	\$104.08	\$159.27	\$216.65	\$74.70	\$232.20

Examples

The following hypothetical examples are included for illustration purposes only and should not be construed as forecasts or projections. There can be no assurance that the results shown will be achieved.

Diversified GIC - Stability Flex Series Example #1 - Hypothetical example of a Maximum Interest

Fixed-rate Reference Asset Return	
Reference Asset Return of the Fixed-rate GIC	2.20%
Reference Asset Return of the Fixed-rate GIC (compounded)	11.49%

Canadian Precision 10 Reference Asset Return

The following table is based on the assumption that most of the price returns for the Reference Shares will increase during the 5-year term of the Diversified GIC - Stability.

Reference Shares	Issue Date	Valuation Date		
	Reference Share Initial Value (Can\$)	Reference Share Final Value (Can\$)	Return of the Reference Shares	Arithmetic average of the 10 middle performing Reference Shares

SUITABILITY CONSIDERATIONS AND GUIDELINES

An investment in the Diversified GIC – Stability is not suitable for all investors and even if suitable, investors should consider what part the Diversified GIC – Stability should serve in an overall investment plan.

Notwithstanding the Fixed-rate GIC, the Diversified GIC – Stability is not a conventional fixed income investment, as it does not provide investors with a defined income stream or return that can be calculated by reference to a fixed or floating rate of interest that is determinable in advance (except for the Guaranteed Interest).

The Variable Interest, other than the Guaranteed Interest, of the Diversified GIC – Stability (if any), unlike the return on conventional fixed income investments offered by Canadian banks, is uncertain in that if the Reference Portfolio does not generate a positive price return at maturity greater than the Guaranteed Interest, the Diversified GIC – Stability will produce no additional Variable Interest on the investor's principal invested on the Issue Date. There is no assurance that the Canadian Precision 10 and the Global Precision 10 will be able to generate a positive price return at maturity. Therefore, there is no assurance that an investor will receive any amount at maturity other than repayment of the principal invested on the Issue Date and the Guaranteed Interest which is equivalent to the Fixed-rate GIC return multiplied by its Reference Asset Weight. Your principal invested on the Issue Date will be repaid only if the Diversified GIC – Stability is held to maturity. Moreover, the value of an investment in the Diversified GIC – Stability may diminish over time owing to inflation and other factors that adversely affect the present value of future payments.

The performance of the Fixed-rate GIC, the 20 Reference Shares included in the Reference Basket of the Canadian Precision 10 and in the Reference Basket of the Global Precision 10 will ultimately determine the Reference Portfolio Return and thus, the Variable Interest. Each investor should make its own investigation, have an understanding and form its own view of each of the Reference Shares. Neither the Bank nor any of its affiliates make any representation or express a view on the merits of the Reference Shares for the purposes of the investment.

The Diversified GIC – Stability is designed for investors who:

Seek the protection at maturity of a guaranteed investment certificate combined with the return potential of the market;

Want exposure to two distinct diversified portfolios of Canadian and global equities;

Have an investment horizon of at least 5 years and who are prepared to hold the Diversified GIC – Stability until maturity;

Are prepared to assume the risks associated with the Diversified GIC – Stability, including a return linked to the performance of the Reference Portfolio;

Are prepared to assume the risk that they may receive only the repayment of the principal that they invested on the Issue Date and the Guaranteed Interest at maturity;

Are prepared to assume that the Diversified GIC – Stability is subject to the Maximum Interest and any positive Reference Portfolio Return beyond the Maximum Interest will not yield any additional return for the Diversified GIC – Stability; and

Are willing to accept a guaranteed return less than that of a fixed rate GICs for the potential to earn a higher market-linked return.

RISK FACTORS

An investment in the Diversified GIC – Stability is not without risk. An investment in the Diversified GIC – Stability is subject to certain risks that investors should carefully examine before purchasing the Diversified GIC – Stability, including the following factors. **Prospective investors that are not prepared to accept the following risks should not invest in the Diversified GIC – Stability.**

Suitability for investment: Diversified GIC – Stability may not be a suitable investment for some investors. An investor should reach a decision to invest in the Diversified GIC – Stability after carefully considering, in conjunction with his or her advisor or otherwise, the suitability of the Diversified GIC – Stability in light of his or her investment objectives and the other information set out in this document.

Uncertain return until maturity; the Diversified GIC – Stability is linked to the return of the Reference Portfolio which includes the Reference Assets. The Variable Interest, other than the Guaranteed Interest, if any, on the Diversified GIC – Stability will not be known until the Maturity Date. There can be no assurance that the Diversified GIC – Stability will generate a positive Variable Interest payment in addition to the Guaranteed Interest. The Diversified GIC – Stability is linked to the return of the Reference Portfolio which is linked to the Fixed-rate GIC and on the ten middle performing Reference Shares in the Reference Basket of the Canadian Precision 10 and in the Reference Basket of the Global Precision 10. There is, moreover, no guarantee that, at maturity, the price of the Reference Shares included in the Reference Baskets will have appreciated since the Issue Date.

Reference Portfolio diversification; due to the weighting of each Reference Asset in the Reference Portfolio, its exposure to the market is limited. The Reference Asset Weight indicates the exposure of the Reference Portfolio to each of the Reference Assets and 65% of the Reference Portfolio of the Diversified GIC – Stability is exposed to the Fixed-rate GIC and only 35% of the Reference Portfolio is exposed to the market including 20% of the exposure to the Canadian market and 15% of the exposure to the global market. See “Risk Factors relating to equities” below.

The Maximum Interest at maturity will only be payable if the Reference Asset Return of each of the Canadian Precision 10 and the Global Precision 10 is equal to or above their maximum Reference Asset Return of 45.00%, which is equivalent to a compound annual rate of return of approximately 7.71%. As a result, investors should be comfortable with the prospects of realizing such performance taking into consideration the manner in which the Reference Asset Return will be calculated (i.e. discarding the returns of 5 highest and the 5 lowest performing Reference Shares as described herein) and taking into consideration the weighting of the Canadian Precision 10 and the Global Precision 10 in the Reference Portfolio and the calculation of the Variable Interest.

Maximum Interest; the return on the Diversified GIC – Stability may not reflect the full Reference Portfolio Return. Because of the Maximum Interest, the Variable Interest on the Diversified GIC – Stability is capped at maturity. Investors will not be able to participate in the full Reference Portfolio Return if its appreciation exceeds this maximum rate of return.

Maximum Reference Asset Return; the Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 may not reflect the full Reference Asset Return. Because the Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 is subject to a maximum of 45.00%, investors will not be able to participate in the full return of each of the Reference Baskets if their appreciation exceeds the fixed maximum rate of return of 45.00%.

The Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 will not reflect the price return of each Reference Share included in each of the Reference Baskets. The Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 will not reflect the return that may be associated with the Reference Basket at the Maturity Date as each of the five Reference Shares with the highest return and each of the five Reference Shares with the lowest return in each Reference Baskets will be ignored for the purposes of calculating the Reference Asset Return. Investors will therefore not participate in the potential price appreciation of each Reference Share in each of the Reference Baskets.

The Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 may be lower than the arithmetic average of the price return of the 20 Reference Shares in the Reference Baskets for each of the Reference Asset. By ignoring the top five performing Reference Shares and the bottom five performing Reference Shares in the calculation of the Reference Asset Return, the arithmetic average of the ten middle performing Reference Shares may be lower than the arithmetic average of the price return of the 20 Reference Shares included in each of the Reference Baskets.

The maximum negative return of each of the bottom five performing Reference Shares is limited to -100% while the maximum positive return of each of the top five performing Reference Shares is unlimited. Therefore, the arithmetic average of the price return of the 20 Reference Shares in each Reference Basket may be higher than the Reference Asset Return.

The return of each Reference Share will not reflect the full appreciation in the Reference Shares when including dividends. The return of the Reference Shares used to calculate the Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 is a price return and will not take into account dividends paid on such shares. As of April 5, 2019, the dividends paid on account of all of the Reference Shares in the Reference Basket of the Canadian Precision 10 represented an annual return of approximately 3.44%. As of April 5, 2019, the dividends paid on account of all of the Reference Shares in the Reference Basket of the Global Precision 10 represented an annual return of approximately 4.20%.

No ownership interest in the Reference Shares. An investment in the Diversified GIC – Stability does not constitute an investment in the Fixed-rate GIC, the Canadian Precision 10, the Global Precision 10 or the Reference Shares included in each of the Reference Basket. An investor will not be a beneficial owner of the Fixed-rate GIC, the Canadian Precision 10, the Global Precision 10 or the Reference Shares during the term of the Diversified GIC – Stability and, in particular, will not be entitled to receive any dividends or similar amounts paid on the Reference Shares, nor will the investor be entitled to any recourse to Fixed-rate GIC, the Canadian Precision 10, the Global Precision 10 or the Reference Shares to satisfy amounts owing under the Diversified GIC – Stability or to acquire Reference Shares by virtue of their ownership of the Diversified GIC – Stability. Moreover, an investor will not be entitled to any voting rights or to other control rights that holders of Reference Shares may have.

Payments at maturity, of the Variable Interest, including the Guaranteed Interest and the principal invested on the Issue Date are unsubordinated and unsecured obligations of the Bank and are dependent upon the creditworthiness of the Bank. Because the obligation to make payments to investors of the GIC is incumbent upon the Bank, the likelihood that such investors will receive the payments owing to them in connection with the Diversified GIC – Stability, including the principal invested on the Issue Date, will be dependent upon the financial health and creditworthiness of the Bank.

No independent calculations; conflict of interest. The Calculation Agent will be solely responsible for calculating the Reference Portfolio Return, the Variable Interest including the Guaranteed Interest, payable at maturity and any other determination and calculation with respect to any payment in connection with the Diversified GIC – Stability. The Calculation Agent will also be solely responsible for determining whether a market disruption or extraordinary event has occurred and for making certain other determinations with regard to the Diversified GIC – Stability and the Reference Portfolio. No calculation agent other than the National Bank of Canada or an affiliate will be retained to make or confirm the determinations and calculations made by the Calculation Agent.

The Bank, as Calculation Agent, may have economic interests that differ from and may be adverse to those of the Diversified GIC – Stability investors, including with respect to certain determinations that the Calculation Agent must make in connection with the amounts owing by the Bank under the terms and conditions of the Diversified GIC – Stability.

In addition, the Bank and its affiliates may engage in trading activities that are neither on behalf of Diversified GIC – Stability investors nor on their own behalf. These trading activities may present a conflict between the interests of Diversified GIC – Stability investors and the interests that the Bank and/or its affiliates have in their proprietary accounts in facilitating transactions, including block trades and other derivatives transactions, for their clients and in accounts under their management. These trading activities, if they influence the value of the Diversified GIC – Stability, could be adverse to the interests of Diversified GIC – Stability investors. The Bank and its affiliates may, at present or in the future, engage in business with issuers of shares comprising the Reference Baskets, including by granting loans and providing advisory services to such entities. These services could include investment banking services, merger and acquisition services and advisory services. These activities may present a conflict between the obligations of the Bank and its affiliates and the interests of Diversified GIC – Stability investors. Moreover, subsidiaries of the Bank may publish research reports on all or part of the issuers of the shares comprising the Reference Baskets. Such research may be modified without notice and represent opinions or recommendations that are inconsistent with purchasing or holding the Diversified GIC – Stability. Any of these activities of the Bank or its affiliates may affect the price of the shares comprising the Reference Baskets and, consequently, the value of Diversified GIC – Stability and the interest payable thereon.

Hedging transactions could have an impact on the Reference Portfolio. No later than the date of maturity, the Bank and the members of its group may hedge all or part of the Bank's anticipated exposure in connection with the Diversified GIC – Stability by investing in the Fixed-rate GIC, the Canadian Precision 10, the Global Precision 10 or by purchasing and selling Reference Shares and/or exchange-traded and/or over-the-counter options on any of the Reference Shares comprising the Reference Baskets and/or futures or futures contracts or by taking positions in any other instruments they may wish to use in connection with hedging. The Bank and its affiliates may also modify a hedge position throughout the term of the Diversified GIC – Stability, including on the Valuation Date. The Bank and its affiliates may also from time to time buy or sell Reference Shares comprising the Reference Baskets or derivatives related to such Reference Shares in connection with their normal business practices. Although the Bank does not believe that such activities will have a material impact on the price of these options, Reference Shares, futures or futures contracts or on the price or level of Reference Shares comprising the Reference Baskets, there is no assurance that the Bank or its affiliates will have no impact on the price or level of Reference Shares or on the value of the Reference Baskets and therefore, on the value of the Reference Portfolio of the Diversified GIC – Stability as a result of such activities. It is possible that the Bank could receive substantial returns or incur substantial losses from these activities while the market value of Diversified GIC – Stability or the value of the Reference Portfolio declines.

The Diversified GIC – Stability could be redeemed prior to maturity under a reimbursement under special circumstances. If a special circumstance (as defined in this document) occurs, the Bank may redeem the Diversified GIC – Stability before their maturity pursuant to a reimbursement under special circumstances. Upon the occurrence of a special circumstance where the Bank decides to reimburse the Diversified GIC – Stability, the Calculation Agent will establish a value for the Diversified GIC – Stability, acting in good faith in accordance with market-accepted methods, based on a number of interrelated factors, such as the appreciation and volatility of the Reference Shares, interest rates and the time remaining to maturity. Such value will be the reimbursement amount, and will not be less than the principal invested on the Issue Date and the accrued portion of the Guaranteed Interest. Under such circumstances, the investor will not be able to participate fully in the increase in the Reference Portfolio that might have occurred up to the payment date pursuant to a reimbursement under special circumstances. Investors may only be entitled to receive their principal invested on the Issue Date and the accrued portion of the Guaranteed Interest.

The occurrence of a market disruption event could postpone the Valuation Date, which may affect the payment at maturity. The occurrence of a market disruption event with respect to one or more Reference Share, as determined by the Calculation Agent acting in good faith, could lead to a postponement of the Valuation Date in respect of the affected Reference Shares up to a maximum of five Business Days, after which the Calculation Agent will use a value for the affected shares established in good faith according to market-accepted practices. If there is a postponement of the Valuation Date in respect of one or more Reference Shares of the Reference Baskets owing to the occurrence of a market disruption event or the absence of a closing price for any such Reference Shares on such day or the primary exchange for any such Reference Share being closed on such date, the interest that would be payable to an investor at maturity could be substantially lower than the interest that would have been otherwise payable at maturity had the Valuation Date not been postponed.

The market-linked GIC is not transferable to other investors; No trading market for the market-linked GIC. Investors should be willing to hold the market-linked GIC to maturity. The market-linked GIC is not transferable to other investors prior to maturity. The market-linked GIC will not be listed on any stock exchange and no secondary market will be provided.

Sale back to the Bank at Bid Price; many factors affect the value of the market-linked GIC; Bid Prices for market-linked GIC may not reflect the return of the underlying interest. You will be able to sell your Diversified GIC - Stability back to the Bank at the Bid Price, as provided herein. To this end, the Bank has appointed the Bid Provider (National Bank Financial Inc.) as its agent to quote on a daily basis a price based on its assessment of the market value for the Diversified GIC - Stability (the “Bid Price”) and to purchase from holders that wish to sell back their Diversified GIC - Stability prior to maturity such Diversified GIC - Stability on behalf of the Bank for resale to the Bank and cancellation.

The Bid Provider will provide a daily Bid Price under normal market conditions. If the trading markets for one or more of the underlying interest are disrupted, or if trading of one or more of the underlying interest is suspended or terminated, or if any other market disruption event occurs, the Bid Provider will generally deem that normal market conditions do not exist. In such instances, there may be no Bid Price quoted and holders may be unable to sell back their market-linked GIC to the Bank.

The fact that the Bank will be the sole purchaser of the market-linked GIC may affect the Bid Price such a holder will receive from the Bid Provider. The Bid Provider will carry out its bid making activities in good faith and in accordance with applicable regulations governing its business.

Holders choosing to sell their market-linked GIC back to the Bank prior to maturity will receive an amount which may not necessarily reflect the return of the underlying interest up to the date of such sale. The price at which a holder will be able to sell the particular market-linked GIC prior to maturity may be at a discount (which could be substantial) from the amount that would be payable if the particular market-linked GIC were maturing on such day, based upon one or more factors. Many factors independent of the Bank’s creditworthiness may affect the Bid Price for the particular market-linked GIC. These factors include those detailed under “Transfers; No Secondary Market; Sale of the Market-Linked GIC to the Bank”. The effect of any one factor may be offset or magnified by the effect of another factor.

Furthermore, the sale of the market-linked GIC back to the Bank will need to be effected using Fundserv (as defined below under the section entitled “Fundserv”). The sale of market-linked GIC using Fundserv is not like standard over-the-counter markets for debt instruments maintained by registered dealers and carries certain restrictions, including selling procedures that require the initiation of an irrevocable sale order at a Bid Price that will not be known prior to placing such sale order. See “Fundserv”.

Conflicts of interest may affect the Bid Provider. The Bid Provider for the market-linked GIC is a wholly-owned subsidiary of the Bank. Under the market-linked GIC, the interests of the holders and the Bank may be different. The Bid Provider will carry out its activities in good faith and in accordance with applicable regulations governing its business.

Risk factors relating to the Reference Shares in the Reference Baskets. Certain risk factors applicable to investors who invest directly in the Reference Shares comprising the Reference Baskets of the Diversified GIC – Stability may apply indirectly to an investment in a Diversified GIC – Stability to the extent that those risk factors could indirectly adversely affect the return of the Reference Portfolio and, consequently, the potential Variable Interest, other than the Guaranteed Interest of the Diversified GIC – Stability. Some of these risk factors are described below.

Risk factors relating to equities. The Reference Baskets are composed of equity securities. As a result, investors will be exposed to equities. The value of most investments and, in particular, equity securities, including the Reference Shares, is affected by changes in general market conditions and by changes in investors' perception of inflation expectations and the condition of the issuers of equity securities. These changes may be caused by actual or anticipated corporate developments, changes in interest rates, changes in the level of inflation, global or regional political, economic or credit crises and other political and economic developments. These changes can affect the price of equity securities which can move up or down, without any predictability. These changes can affect the price of the Reference Shares, which can increase or decrease unforeseeably. It is possible that the price of the Reference Shares might not appreciate after the Issue Date and could in fact fall. A decline in the price of the Reference Shares would therefore be detrimental to the Reference Asset Return of each of the Canadian Precision 10 and the Global Precision 10 and therefore, to the Reference Portfolio Return.

Exposure to foreign investments. Some Reference Shares are shares of foreign companies. The value of foreign investments may be affected by factors not typically associated with investments made in Canada. For example, there may be less information available about foreign companies, lower standards of government supervision and regulation, and different accounting and financial reporting standards. In addition, foreign investments sometimes cannot be sold as quickly or as easily as similar investments in Canada. Political, social and economic instability as well as diplomatic developments can also negatively affect the value of foreign investments. An investment in foreign markets may be subject to changes in imposition of taxes or in expropriation of assets. All these factors can influence the value of investments in Diversified GIC – Stability.

Adjustments to the Reference Baskets may have an impact on the Variable Interest. The composition of the Reference Baskets may be subject to changes and adjustments as described herein. Such changes or adjustments will have an impact on the Reference Asset Return of the Canadian Precision 10 and the Global Precision 10 and, consequently, the Variable Interest.

TRANSFERS; NO SECONDARY MARKET; SALE OF THE MARKET-LINKED GIC TO THE BANK

Investors should be willing to hold the market-linked GIC to maturity. The market-linked GIC is not transferable to other investors prior to maturity.

The market-linked GIC will not be listed on any stock exchange and no secondary market will be provided.

You will however be able to sell your Diversified GIC - Stability back to the Bank at the Bid Price. To this end, the Bank has appointed the Bid Provider (National Bank Financial Inc.) as its agent to quote on a daily basis a Bid Price based on its assessment of the market value for the Diversified GIC - Stability and to purchase from holders that wish to sell back their Diversified GIC - Stability prior to maturity such Diversified GIC - Stability on behalf of the Bank for resale to the Bank and cancellation.

The Bid Provider will maintain until the last valuation date, under normal market conditions, a daily Bid Price for the market-linked GIC. If the trading markets for one or more of the underlying interest are disrupted, or if trading of one or more of the underlying interest is suspended or terminated, or if any other market disruption event occurs, the Bid Provider will generally deem that normal market conditions do not exist. In such instances, there may be no Bid Price quoted and holders may be unable to sell back their market-linked GIC to the Bank.

If you decide to sell the market-linked GIC back to the Bank prior to maturity, you may receive less than the initial principal amount per market-linked GIC, even if the performance of the Reference Portfolio up to that time has been positive. See "Risk Factors – Sale back to the Bank at Bid Price; many factors affect the value of the market-linked GIC; Bid Prices for market-linked GIC may not reflect the return of the underlying interest."

Fundserv carries certain restrictions with respect to the sale of market-linked GICs, including the selling procedures that require an irrevocable sale order be initiated at a Bid Price that will not be known prior to initiating such sale order. See "Fundserv".

There will not be any market for the market-linked GIC other than the ability to sell back the market-linked GIC to the Bank under the conditions described above. If you cannot accept that the transfer and sale is limited in this way or you must have the ability to sell back to the Bank at all times, you should not invest in the market-linked GIC.

Factors affecting the Bid Price of the market-linked GIC. The Bid Price of a market-linked GIC will be determined by the Bid Provider at any time, acting in its sole discretion, based on its assessment of the market value of the market-linked GIC and will be dependent upon a number of factors, which may include, among other things:

interest rates in the market – an increase in interest rates will adversely affect the price of the market-linked GIC;

the return of each underlying interest since the Issue Date – a negative return will adversely affect the price of the market-linked GIC;

the time remaining until the maturity of the market-linked GIC – where the value may be discounted prior to such time;

the volatility of each underlying interest (i.e., the frequency and magnitude of changes in the price of each underlying interest) – high volatility may adversely affect the price of each underlying interest, adversely affecting the Reference Portfolio Return and therefore the price of the market-linked GIC;

economic, financial, political, regulatory or judicial events that affect the price of each underlying interest – which will affect the return of each underlying interest and therefore the Reference Portfolio Return and price of the market-linked GIC;

the liquidity and market price of each underlying interest and the other factors that affect each underlying interest markets generally – poor liquidity and price will adversely affect the return of each underlying interest and therefore the Reference Portfolio Return and price of the market-linked GIC;

the creditworthiness of the Bank – a deterioration of the creditworthiness of the Bank may bring uncertainty as to the capacity of paying amounts owed under the market-linked GIC at maturity, and therefore adversely affect the demand for and price of the market-linked GIC; and

the Bank's costs relating to the market-linked GIC, including the cost of hedging its obligations under the market-linked GIC – When offering a Bid Price for a market-linked GIC, the Bid Provider will consider the price it will receive when it will sell back the market-linked GIC to the Bank, which price will reflect the Bank's costs relating to the manufacture, sale and hedging of the market-linked GIC.

The effect of any one factor may be offset or amplified by the effect of another factor. The relationship among these factors is complex and may also be influenced by various political, economic and other factors that can affect the Bid Price of a market-linked GIC. In particular, you should realize that any Bid Price for a market-linked GIC may have a non-linear sensitivity to the increases and decreases in the prices of each underlying interest (i.e., the Bid Price for a market-linked GIC will increase and decrease at a different rate compared to the percentage increases and decreases in the prices of each underlying interest). As well, the Bid Price for a market-linked GIC may be substantially affected by changes in the level of interest rates independent of performance of each underlying interest.

Moreover, while the Maturity Redemption Payment is based on the full principal amount of the market-linked GIC, the pricing of the market-linked GIC will factor in the Bank's costs relating to the market-linked GIC, including the cost of hedging its obligations under the market-linked GIC. As a result, assuming no change in market conditions and any other relevant factors highlighted herein that may affect the Bid Price of the market-linked GIC, the Bid Price will likely be lower than the original issue price.

You should consult your investment advisors as to whether it would be more favorable in the circumstances at any time to sell the market-linked GIC or to hold the market-linked GIC until maturity. You should also consult and rely on your own tax advisors as to the tax consequences arising from a sale of a market-linked GIC prior to the Maturity Date as compared to holding the market-linked GIC until the Maturity Date. See "Tax Considerations".

FUNDSERV

"Fundserv" means either the network maintained and operated by Fundserv Inc. for electronic communication with participating companies, including the receiving of orders, order match, contracting, registrations and settlement of orders, transmission of confirmation of purchases, and the redemption of investments or instruments, or the applicable internal system maintained by the Bank.

In order to purchase market-linked GIC using Fundserv, the full principal amount must be delivered to the Bank in immediately available funds prior to the Issue Date. Despite delivery of such funds, the Bank reserves the right not to accept any offer to purchase a market-linked GIC, in whole or in part. If a subscription for a market-linked GIC is not accepted (in whole or in part) or the market-linked GICs are not issued to you for any reason, such funds will be returned forthwith to you. In any case, if the market-linked GICs are not issued for any reason as determined by the Bank, no interest or other compensation will be paid to you on such funds.

Sale of market-linked GICs to the Bank. If you wish to sell back the market-linked GICs to the Bank prior to maturity, you will be subject to certain procedures and limitations and you should consult with your financial advisor in advance in order to understand the timing and other procedural requirements and limitations of selling. You will not be able to negotiate a sale price for the market-linked GICs. Instead, you will need to initiate an irrevocable request to sell the market-linked GIC in accordance with the then established procedures of Fundserv. Provided that you initiate the redemption request by 1:00 p.m. (Montreal time) on any Business Day, the request will be treated on the same day. Any request received after such time or on a day that is not a Business Day will be deemed to be a request sent and received in respect of the following Business Day. Sale of the market-linked GIC will be effected at a sale price established after the close of market on the day the request is treated, equal to the bid of a market-linked GIC on the applicable day, as posted by the Bid Provider.

The Bid Provider will provide the Bank for posting, under normal market conditions as part of its agreement to quote a Bid Price for the market-linked GICs, a bid for the market-linked GICs on a daily basis, which value may also be used for valuation purposes in any statement sent to holders. The Bid Price will actually represent the Bid Provider's Bid Price for the market-linked GICs (i.e., the price it is offering to purchase market-linked GICs) for the applicable day. There is no guarantee that the Bid Price for any day is the highest Bid Price possible for the market-linked GICs, but will represent the Bid Provider's Bid Price generally available to all holders, including clients of the Bid Provider.

GENERAL CONDITIONS OF THE INVESTMENT

MARKET-LINKED GUARANTEED INVESTMENT CERTIFICATE (the market-linked GICs) INFORMATION STATEMENT DATED APRIL 18, 2019.

This Information Statement should be completed with the F.15142-002 or, where applicable, any other form required by the Bank or its affiliates.

1. The initial principal amount and the guaranteed interest (if any) are both fully guaranteed at maturity by the Bank. The initial principal amount will be invested on the Issue Date (the "principal invested on the Issue Date").
2. The Calculation Agent will be National Bank of Canada.
3. A market-linked GIC issued by the Bank that is payable in Canada in Canadian dollars and has a term no longer than five years is insured by the Canada Deposit Insurance Corporation (CDIC), subject to the maximum dollar limit of CDIC coverage and applicable conditions. More information about CDIC deposit insurance can be found in the "Protecting Your Deposits" brochure, available online at www.cdic.ca or by telephone at 1-800-461-2342.
4. A minimum investment of \$500 is required for any investment in a market-linked GIC. The Bank reserves the right to discontinue accepting subscriptions at any time without notice. The Bank or National Bank Investments Inc. (the "Agent"), may in its sole discretion, at any time prior to the Issue Date, elect whether or not to proceed in whole or in part with the issue of a market-linked GIC. If for any reason the closing of this offering does not occur, any unaccepted initial principal amount will be returned to investors, without interest or charge. Moreover, the Bank may, in its sole discretion, postpone the Issue Date to a later date within thirty days following the Issue Date specified in this Information Statement. In such case, the Maturity Date will be adjusted in order to correspond to the end of the term following the market-linked GIC's Issue Date.
5. The investment is in Canadian dollars. The principal invested on the Issue Date and interest, if any, will be repaid in Canadian dollars.
6. The Bank has entered into an agency agreement with the Agent pursuant to which the Agent has agreed to offer market-linked GICs for sale on a best efforts basis. The Agent is a wholly owned subsidiary of the Bank.
7. The market-linked GICs are offered only in the provinces and territories in Canada where permitted by law. The market-linked GICs may be subject to other restrictions in a given province or territory.
8. Principal invested on the Issue Date and Variable Interest, if any, will be repaid within the 1st Business Day following the Maturity Date of this investment or the payment date of the guaranteed interest, if any, during the Bank's regular business hours.
9. Before the Maturity Date of the market-linked GIC and in accordance with the conditions set forth in the contract between the investor and his advisor or broker, it is the investor's responsibility to give the relevant instructions to his advisor or broker with respect to the reinvestment, at maturity, of the principal invested on the Issue Date (together with the Variable Interest, if any).

If the investor has not provided the Bank with instructions regarding the payment of those amounts payable following the Maturity Date, amounts owed pursuant to the market-linked GIC will be transferred into the Altamira High-Interest CashPerformer® account at no charge to the investor.
10. Variable Interest on a market-linked GIC is based on variation of the value of the underlying asset, including, without limitation, a Reference Index, Reference Share, Reference Unit or Reference Portfolio. Such underlying asset value may fluctuate up or down. These fluctuations will have a direct impact on the returns of market-linked GICs. **The return of the underlying asset could therefore be nil; in this case, no interest (other than the guaranteed interest, if applicable) would be paid.**
11. The rate of return at maturity or at any other specified time period is not an annual interest rate, unless otherwise specified.
12. It is possible that a disruption in the financial markets, a change in the calculation or publication of the underlying asset or any other event beyond the control of the Bank, may occur and affect the ability of the Calculation Agent to calculate the return or to fulfill any other obligation. In such case, the Bank may not comply with the general and specific conditions of the market-linked GIC and in such case, the Calculation Agent may take any measures deemed necessary, including, without limitation, an adjustment of the amount payable before or at maturity of the market-linked GIC, deferral of the calculation or payment of the return, a different determination of the return or the use of a replacement underlying asset. The Calculation Agent will be solely responsible for determining and calculating the return of the applicable underlying asset. The Calculation Agent will also decide whether a market disruption event has occurred and make any other decisions necessary with regard to the market-linked GICs. All the decisions and calculations made by the Calculation Agent are in its sole discretion and, except for obvious errors, are final and binding. A "market disruption event" means, with respect to

an underlying asset, any *bona fide* event, circumstance or cause (whether or not reasonably foreseeable) beyond the reasonable control of the Calculation Agent or any person that does not deal at arm's length with the Calculation Agent which has or will have a material adverse effect on the ability of the Bank generally to place, maintain or modify hedge positions in respect of any underlying asset or the market-linked GICs. A market disruption event may include, without limitation, a suspension, absence or material limitation of trading or subscription, a regulatory change or any event having a material adverse effect on the financial markets.

13. If a special circumstance (as defined below) occurs, the Bank may redeem the market-linked GICs before their maturity pursuant to a reimbursement under special circumstances. Upon the occurrence of a special circumstance where the Bank decides to reimburse the market-linked GICs, the Calculation Agent will establish a value for the market-linked GICs, acting in good faith in accordance with market-accepted methods, based on a number of interrelated factors, such as the appreciation and volatility of the underlying asset and the time remaining to maturity. Such value will be the reimbursement amount, and will not be less than the principal invested on the Issue Date and if applicable, the accrued portion of the guaranteed interest. Under such circumstances, the investor will not be able to participate fully in the increase of the underlying asset that might have occurred up to the payment date pursuant to a reimbursement under special circumstances. Investors may only be entitled to receive their principal invested on the Issue Date and if applicable, the accrued portion of the guaranteed interest. A "special circumstance" means a circumstance of a taxation nature where, in the opinion of the Bank, acting reasonably and in good faith, an amendment or a change is made to an act, regulation, policy, taxation practice or administration or to the interpretation of an act, regulation, policy, taxation practice policy or taxation administration which would make it illegal or, from the Bank's perspective, disadvantageous from a legislative, regulatory or financial point of view, for the market-linked GIC to remain outstanding.

14. There is no assurance that an investment in the market-linked GIC will be eligible for protection under the Canadian Investor Protection Fund (CIPF). An investor should take the necessary steps in order to verify the product's eligibility with respect to the protection under the CIPF and, where applicable, consult with his or her investment advisor as to whether the investor's investment in the market-linked GIC is eligible for protection in light of such investor's particular circumstances.

15. Investors shall be entitled to a right of cancellation, which must be exercised within two Business Days after the later of (i) the day on which the agreement to purchase the market-linked GIC is entered into, and (ii) the day on which this Information Statement is provided to the purchaser.

The agreement to purchase the market-linked GIC will be entered into (i) if the order to purchase is received via telephone or electronic means, on the day on which the order to purchase is received, and (ii) if the order to purchase is received in person, on the later of the second day following (a) the day on which the Information Statement is provided to the investor and (b) the day on which the order to purchase is received.

Investors will be deemed to have been provided the Information Statement (i) on the day recorded as the time of sending by the server or other electronic transmission system, if provided by electronic means; (ii) on the day recorded as the time of sending by a fax machine, if provided by fax; (iii) five Business Days after the postmark date, if provided by mail; and (iv) when it is received, in any other case.

Upon cancellation of the purchase of the market-linked GIC, the purchaser will be entitled to a refund of the principal invested on the Issue Date. To exercise their right of cancellation, the investor may contact their branch advisor or their broker with whom their account is held.

16. All information regarding the market-linked GIC is available on the Bank's Internet Banking Solutions, on the website www.bnc.ca, by contacting your branch advisor, by calling 1-888-4-TELNAT or by contacting an investment service representative from National Bank Direct Brokerage at 514-866-6755 or 1-800-363-3511.

The Calculation Agent is responsible for all calculations and decisions concerning the market-linked GIC; it will calculate the interest payable at maturity, the variation of the applicable underlying asset value on the Issue Date and the Valuation Date and will determine if a market disruption or an extraordinary event has occurred. All the Calculation Agent's decisions will bind the investors of the market-linked GIC. The Calculation Agent will act in good faith in accordance with accepted market practices.

17. The terms of the market-linked GICs may be amended by the Bank without the consent of the investors if, in the reasonable opinion of the Bank, the amendment would not materially and adversely affect the interest of the investors. In all other cases, the Bank will provide investors a notice of the amendment prior to making the amendment or without delay after the amendment is made.

18. The Bank will give notice to the holders of any material events relating to the market-linked GICs, including any amendments to the market-linked GICs that impacts interest payable under the market-linked GICs. All notices to the investors will be validly given once published on the website www.bnc.ca.

19. In this document, "Business Day" means every day, other than a Saturday or a Sunday or a day on which commercial Banks in either Montreal or Toronto are required or authorized by law to remain closed and every day that the Toronto Stock Exchange is open for business.

-
20. Market-linked GICs will not be transferable between investors and will not be listed on any stock exchange or other market. As described in the Information Statement, holders will be able to sell their market-linked GIC back to the Bank through National Bank Financial Inc., the Bid Provider, which shall be appointed as agent to the Bank to place a daily Bid Price for the market-linked GIC under normal market conditions and purchase market-linked GICs on behalf of the Bank for resale to the Bank and cancellation.
 21. Funds delivered to the Bank prior to the Issue Date will be held in escrow pending closing of the offering of the market-linked GICs. A purchaser of market-linked GICs will receive from the Bank credit for interest accruing on funds so delivered at a rate of 0.25% per annum from and including the first Business Day after such funds are received by the Bank to but excluding the Issue Date. For the avoidance of doubt, such interest will not be payable in cash but will be added to the principal invested on the Issue Date. Despite delivery of such funds, the Bank reserves the right not to accept any offer to purchase market-linked GICs, in whole or in part. If a subscription for market-linked GICs is not accepted (in whole or in part) or market-linked GICs are not issued to the investors for any reason, such funds will be returned forthwith to the investor. In such case and notwithstanding the foregoing, no interest or other compensation will be paid to the investor on such funds.
 22. Notwithstanding the foregoing, no interest or any other amount will be paid during the selling period.
 23. Federal laws of Canada prohibit anyone from charging or receiving interest or other amounts for the advancing of credit at effective rates in excess of 60% per annum. Therefore, when any payment is to be made by the Bank to an investor at the Maturity Date, payment of a portion of such payment constituting a variable interest that would exceed 60% per annum may be deferred to ensure compliance with such laws. The Bank will pay any portion so deferred to the investor together with interest at the Bank's equivalent term deposit rate as soon as Canadian law permits. In addition, the Bank may withhold a portion of any payment to an investor that the Bank is legally able or required to withhold.

Investors should be aware that market-linked GICs are not securities issued by a mutual fund and that investors do not benefit from certain rights and recourses otherwise provided by certain securities laws in connection with the issuance of such securities, including the right to receive a prospectus and other current information documents provided by issuers, right of rescission and certain other rights to rescind a purchase, revise the purchase price or seek damages in case documents show false or misleading information. However, investors will receive a copy of this document, which grants investors in certain circumstances a contractual right of rescission described herein.

TAX CONSIDERATIONS

To the persons concerned:

The following is a summary of the principal federal income tax implications in Canada that generally apply to individuals (other than trusts) who purchase the market-linked GIC from the Bank who, at all times, for the purposes of the *Income Tax Act* (Canada) (the "Act") are residents of Canada, and who hold the market-linked GIC until maturity outside of a registered savings plan (such as a Registered Retirement Savings Plan, a Registered Retirement Income Fund, a Registered Education Savings Plan, a Registered Disability Savings Plan, a Tax-free Savings Account or a Deferred Profit Sharing Plan). The information provided below is based on the provisions of the Act and the regulations thereunder ("Regulations") in effect on the date that this summary was drafted, all specific proposed amendments to the Act and its Regulations as publicly announced by the Minister of Finance prior to the date on which this summary was drafted, and certain administrative policies and practices of the Canada Revenue Agency. Provincial and foreign tax considerations have not been addressed in this document and may differ from the federal income tax consequences discussed herein.

This summary is of a general nature; it is not exhaustive of all Canadian federal income tax considerations and does not constitute legal or tax advice to investors. No advice is provided concerning the Canadian federal income tax on the specific situation of a particular investor.

Please consult your tax specialist with respect to your situation.

Inclusion in income:

A Canadian resident investor will be required to include the full amount of interest accrued on the funds delivered prior the Issue Date in the investor's income in computing its income for the taxation year of the investor that includes the Issue Date for purposes of the Act.

In certain circumstances, provisions of the Act can deem interest to accrue on a "prescribed debt obligation" (as defined for purposes of the Act), which includes a market-linked GIC. Based on an understanding of the Canada Revenue Agency's administrative policies and assessing practices, there should be no deemed accrual of interest on the market-linked GIC, other than the interest in respect of the guaranteed minimum interest, under these provisions prior to the date on which the Variable Interest becomes calculable.

In the case of investments in a market-linked GIC with a guaranteed minimum rate, an investor must include in computing his or her income annually the amount that is paid in respect of the guaranteed minimum rate on the market-linked GIC or, if the guaranteed minimum rate is not paid in the year, the amount that is accrued or deemed to accrue in respect of a particular year, up to and including each anniversary of the issuance of such market-linked GIC occurring during the particular year. The amount by which the final value of the investment that is determined at the maturity of the market-linked GIC exceeds the total of the principal amount of the market-linked GIC and the minimum rate that has not already been included in the calculation of the investor's income for the previous years will be included in the investor's income for the taxation year in which the date of maturity of the market-linked GIC falls.

In the case of investments in a market-linked GIC without a guaranteed minimum rate, investors are generally not required to add an amount to their income with respect to the market-linked GIC for a particular year until the final investment value has been determined at maturity. At maturity, if the investor receives interest, he must include this interest in his income. If there is a disposition or deemed disposition of a market-linked GIC, an investor may be deemed to receive interest on the market-linked GIC in the taxation year in which the disposition or deemed disposition occurs.

To the extent that a registered retirement income fund disposes of a market-linked GIC prior to maturity and, as discussed under "Risk Factors" above, receives less than the initial principal amount thereof, the "minimum amount" (as defined in the Act) required to be withdrawn by an investor of the registered retirement income fund would generally not be reduced or otherwise impacted for the taxation year in which the disposition occurs.

Information concerning registered plans. Based on the legislation in effect on the date hereof, the market-linked GICs will, at the Issue Date, be qualified investments under the Act for trusts governed by registered retirement savings plans ("RRSPs"), registered retirement income funds ("RRIFs"), registered education savings plans ("RESPs"), registered disability savings plans ("RDSPs"), deferred profit sharing plans ("DPSPs") (other than DPSPs to which contributions are made by the Bank or a person or partnership with which the Bank does not deal at arm's length within the meaning of the Act) and tax-free savings accounts ("TFSA"). If the market-linked GICs are "prohibited investments" (within the meaning of the Act), for an RRSP, RRIF, RESP, RDSP or TFSA the annuitant of the RRSP or the RRIF, the subscriber of the RESP, or the holder of the RDSP or the TFSA (as the case may be) (the "Plan Holder") will be subject to a penalty tax as set out in the Act. The market-linked GICs will be "prohibited investments" (within the meaning of the Act) for an RRSP, RRIF, RESP, RDSP or TFSA belonging to a Plan Holder who has a "significant interest" (as defined in the Act) in the Bank or who does not deal at arm's length with the Bank for the purposes of the Act. Investors should consult their own tax advisors in this regard.
