## Management Discussion of Fund Performance

### Results of Operations

For the six-month period ended June 30, 2023, the NBI Canadian High Conviction Equity Private Portfolio's Advisor Series units returned 5.10% compared to 5.70% for the Fund's benchmark, the S&P/TSX Composite Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value rose by 5.47% over the period, from \$1.998 billion as at December 31, 2022 to \$2.107 billion as at June 30, 2023.

Investors continue to focus on macroeconomic factors, including inflation and interest rates. A historic surge in immigration has supported consumption and overall economic growth while playing a crucial role in stabilizing housing. This helped prompt the Bank of Canada (BoC) to hike its target rate in June after being on a conditional pause for most of the year. Economists continue to factor in a high probability of a recession due to tighter fiscal policy, although equity markets appear to be reflecting a lower chance the economy will slow significantly.

Over the period the Fund underperformed its benchmark. The Materials sector performed the worst owing to negative returns in the gold sub-sector. Receding concerns about the U.S. regional banking stress and better investor mood in general meant less demand for gold's "safe haven" quality, leading to a lower price for the commodity and gold companies more broadly. This helped relative performance, given the typical underweight positioning in this area.

Security selection in the Industrials sector was also an important contributor to performance.

The notable detractor came from positioning in the Information Technology sector. E-commerce company Shopify was up significantly, as investors viewed favourably its plans to re-focus on the core business while controlling expenses. Though the portfolio manager established a position in the company late last year following a major sell-off in the stock, he remains cautious overall with a lower weight than the benchmark, as expectations for the business remain too optimistic in our view.

### Recent Developments

The Fund's overall stance has not changed materially from the previous period, and he continues to position the portfolio conservatively. While valuations are reasonable across many sectors, the risk to earnings is elevated relative to expectations in his view, especially in economically sensitive areas of the market.

For example, consensus expectations for Canadian banks reflect a benign operating environment despite several headwinds, including higher expenses, lower margins, potential for larger credit losses, and increasing regulatory capital requirements. The portfolio manager is more focused on these risks as part of his scenario work and continues to adjust his positioning away from banks he views as more vulnerable (CIBC, Scotiabank) while adding to TD given the strength of its domestic franchise and significant excess capital, which should support share buybacks and potential growth opportunities.

Energy is another economically sensitive sector where he reduced exposure, as outlook for underlying commodities remains uncertain. While production cuts have provided support for oil prices, spare capacity is likely to have the opposite effect when demand becomes stronger. He trimmed a position in Suncor in anticipation of additional capital the company will need to spend to replace expiring production. Overall, he continues to favour large, low-cost, and integrated producers.

Investors continue to focus on macroeconomic factors including inflation and interest rates, but recent data points do not yet suggest a conclusive path for equities. Inflation continues to moderate, leading to expectations that central banks are nearing the end of a series of rapid interest-rate hikes.

Economists continue to factor in a high probability of a recession due to tighter fiscal policy, although equity markets appear to be reflecting a lower chance the economy will slow significantly, vulnerabilities exist for leveraged entities. The portfolio manager assigns an 80% chance to a recession materializing and expect that it will occur in the second half of this year.

On May 1, 2023, the Fund's independent review committee (the "IRC") was increased to four members when Stéphanie Raymond-Bougie was appointed as IRC member.

The applicable standing instructions require that these transactions be carried out in accordance with NBII policies, which specify, in particular, that investment decisions pertaining to these related party transactions must be made free from any influence by an entity related to NBII and without taking into account any consideration relevant to an entity related to NBII. Furthermore, the investment decisions must represent the business judgment of the securities advisor, uninfluenced by considerations other than the best interest of the Fund and must achieve a fair and reasonable result for the Fund.

### Registered Plan Trust Services

NBT receives a fixed amount per registered account for services provided as trustee for registered plans.

### Administrative and Operating Services

These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

### Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. Under the *Distribution* heading, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit.

The management fees paid by the Fund only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the profiles of the NBI Private Wealth Management service ("PWM"). General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM's service fees, which are paid directly by investors. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees is as follows:

Series	Management Fees	Distribution	Others <sup>†</sup>
Advisor Series			
Front-end load	1.45%	68.97%	31.03%
Series T5

<sup>(\*)</sup> For Series N and NR, offered only to investors using the NBI Private Wealth Management service ("PWM"), management fees only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the PWM profiles. General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM's service fees, which are paid directly by investors.

<sup>(\*\*)</sup> There are no management fees paid by the Fund with respect to the Series O. Instead, Series O securityholders pay a negotiated administration fee directly to National Bank Investments.

## Past Performance

The performance of each series of the Fund is presented below and calculated as at December 31 of each year. It assumes that all distributions made in the periods shown were reinvested in additional securities and does not take into account sales, redemption charges, distributions, or optional charges that would have reduced returns. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

## Annual Returns

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, in the case of the Annual management report of fund performance, or by June 30, in the case of the Interim management report of fund performance.

<sup>(1)</sup> Returns for the period from May 21, 2015 (commencement of operations) to December 31, 2015.

<sup>(2)</sup> Returns for the period from July 14, 2015 (commencement of operations) to December 31, 2015.

<sup>(3)</sup> Returns for the period from October 30, 2015 (commencement of operations) to December 31, 2015.

<sup>(†)</sup> Returns for the period from January 1, 2023 to June 30, 2023.

<sup>(5)</sup> This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

<sup>(6)</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

<sup>(7)</sup> Distributions were paid in cash or reinvested in additional units of the Fund, or both.

<sup>(a)</sup> The net assets are calculated in accordance with IFRS.

<sup>(5)</sup> This information is provided as at the last day of the accounting period shown.

<sup>(6)</sup> Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.

<sup>(7)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

<sup>(8)</sup> The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
