

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period ended June 30, 2020

Specialized Fund
NBI Resource Fund

Notes on forward-looking statements

This report may contain forward-looking statements concerning the Fund, its future performance, its strategies or prospects or about future events or circumstances. Such forward-looking statements include, among others, statements with respect to our beliefs, plans, expectations, estimates and intentions. The use of the expressions "foresee", "intend", "anticipate", "estimate", "assume", "believe" and "expect" and other similar terms and expressions indicate forward-looking statements.

By their very nature, forward-looking statements imply the use of assumptions and necessarily involve inherent risks and uncertainties. Consequently, there is a significant risk that the explicit or implicit forecasts contained in these forward-looking statements might not materialize or that they may not prove to be accurate in the future. A number of factors could cause future results, conditions or events to differ materially from the objectives, expectations, estimates or intentions expressed in such forward-looking statements. Such differences might be caused by several factors, including changes in Canadian and worldwide economic and financial conditions (in particular interest and exchange rates and the prices of other financial instruments), market trends, new regulatory provisions, competition, changes in technology and the potential impact of conflicts and other international events.

The foregoing list of factors is not exhaustive. Before making any investment decision, investors and others relying on our forward-looking statements should carefully consider the foregoing factors and other factors. We caution readers not to rely unduly on these forward-looking statements. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so provides.

This interim management report of fund performance contains financial highlights, but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-888-270-3941 or 514-871-2082, by writing to us at National Bank Investments Advisory Service, 500, Place d'Armes, 12th floor, Montreal, Quebec, H2Y 2W3, by visiting our website at www.nbinvestments.ca, by visiting SEDAR's website at www.sedar.com, or by contacting your advisor. You may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Results of Operations

For the six-month period ended June 30, 2020, the NBI Resource Fund's Investor Series units returned -10.85% compared to -7.49% for the Fund's blended benchmark. The broad-based index, the S&P/TSX Composite Index (CAD), returned -7.47%. Unlike the indices, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

The Fund's net asset value dropped by 14.81% over the period, from \$59.76 million as at December 31, 2019 to \$50.91 million as at June 30, 2020.

This decline stemmed mainly from market fluctuations.

The first semester of 2020 has been very much a tale of two cities in the resource sector. The prices of gold and precious metals stocks have benefited from the macroeconomic uncertainty associated with the COVID-19 pandemic. On the other hand, oil and energy stocks have been adversely impacted by the decreased demand due to the pandemic and a supply shock earlier in the year as Saudi Arabia and Russia waged a price war. This sent oil prices plummeting to multi-decade lows by mid-April. The plunge in prices forced producers to protect their balance sheets by reining in capital expenditures, cutting or suspending dividends, shutting in production and renegotiating credit lines with lenders. Oil prices have recovered since April on the back of aggressive OPEC production cuts, producers curtailing oil production and an increase in demand as many countries began the process of restarting their economies. These factors have resulted in a significant recovery in both oil and refined product prices.

On the other hand, the COVID-19 pandemic has forced the U.S. Federal Reserve (the "Fed") and its global central bank counterparts to inject substantial amounts of liquidity into the system. Real interest rates have gone from low to almost zero, and even negative in some parts of the world which has increased the demand for hard assets and safe-haven assets such as gold. This type of environment is generally supportive for gold prices. The last six months have been a tremendous period for both precious metals commodities and the related equities. Gold prices started the year around \$1,500 and closed just shy of \$1,800 per ounce at the end of June. This is a level where most companies, even higher-cost producers, will generate significant free cash flow. This has been reflected in the significant upward appreciation of most stocks in the benchmark over the last six months. While COVID-19-related mine site shutdowns have occurred, investors have mostly looked through these as transitory issues.

In this context, the NBI Resource Fund underperformed its benchmark in the first half of 2020. Companies such as Torc Oil and Gas, Kelt Exploration and Enerplus were all down in the 60%-70% range. However, while precious metals stocks could not claw back all the losses versus the benchmark, there were a few notable outperformers including B2Gold (+50%), Newmont Mining (+50%) and SilverCrest Metals (+42%).

Recent Developments

In the past periods, when gold prices have risen significantly, many companies pursued growth in order to get more leverage to what appeared to be a long-term, upward rising gold price. Capital was allocated to marginal organic projects with unattractive or very low rates of return and towards mergers and acquisitions ("M&A") that turned out to be either poor strategic decisions or simply a waste of capital and resources. This ultimately led to cost inflation, suboptimal returns, leveraged balance sheets and poorly performing stocks as the gold price stagnated or fell.

However, in the portfolio manager's recent conversations with management teams across the sector, a consistent message and commitment to disciplined capital allocation were noticed. Companies are only moving forward with high return organic projects, focusing exploration capital around existing developments, examining zero-premium M&A or looking to pay down debt and increase dividends. While the portfolio manager cannot tell if this time will be different, the Fund will continue to focus on those companies with a consistent message around disciplined capital allocation in this time of rising gold prices.

In terms of the Energy sector, as mentioned earlier, discussions with senior management teams suggest the sector needs an oil barrel price of \$45-\$50 in order to deploy capital at attractive returns. The portfolio manager believes there will be periods where the oil price trades both above and below this range for some time. Considering this outlook, the portfolio manager will continue to add low-cost producers with strong balance sheets to provide downside protection during those periods of weaker prices.

On April 30, 2020, the Fund's independent review committee (the "IRC") was reduced to three members when Jacques Valotaire and Jean-François Bernier resigned as IRC members.

Related Party Transactions

National Bank of Canada ("the Bank") and its affiliated companies' roles and responsibilities related to the Fund are as follows:

Trustee, Custodian, and Registrar

Natcan Trust Company ("NTC"), a direct or indirect wholly-owned subsidiary of the Bank, is the Fund's trustee. In this capacity, it is the legal owner of the Fund's investments.

NTC acts as registrar for the Fund's securities and the names of securityholders. NTC also acts as the Fund's custodian. The fees for NTC's custodial services are based on the standard rates in effect at NTC.

Agent for securities lending transactions

NTC acts as the agent for securities lending transactions acts on behalf of the Fund in administering securities lending transactions entered into by the Fund. NTC is an affiliate of the Manager.

Fund Manager

The Fund is managed by National Bank Investments Inc. ("NBII"), which is a wholly-owned subsidiary of the Bank. Therefore, NBII provides or ensures the provision of all general management and administrative services required by the Fund's current operations, including investment consulting, the arrangement of brokerage contracts for the purchase and sale of the investment portfolio, bookkeeping and other administrative services required by the Fund.

The Manager pays the operating expenses of the Fund other than its "Fund costs" (defined below) (the "variable operating expenses"), in exchange for the Fund's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Fund shall also pay certain Fund costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Fund.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Fund costs.

As described under the heading *Management Fees*, the Fund pays annual management fees to NBII as consideration for its services.

Distribution and Dealer Compensation

NBII acts as principal distributor for the Fund. In this capacity, NBII buys, sells and swaps securities through Bank branches and the National Bank Investments Advisory Service in Canadian provinces and territories, and through external registered representatives. Fund securities are also offered by National Bank Financial Inc. (including its division National Bank Direct Brokerage), CABN Investments (a division of NBII) and other affiliated entities. Brokers may receive, depending on the distributed series, a monthly commission representing a percentage of the average daily value of the securities held by their clients.

Brokerage Fees

The Fund may pay broker's commissions at market rates to a corporation affiliated with NBII. The brokerage fees paid by the Fund for the period are as follows:

	Period ended June 30, 2020
Total brokerage fees	32,858.98
Brokerage fees paid to National Bank Financial	300.00

Independent Review Committee Approvals and Recommendations

The Fund followed the standing instructions of its Independent Review Committee with respect to one or more of the following transactions:

- Purchasing or holding the securities of a related issuer, in particular, those of National Bank of Canada;
- Investing in the securities of an issuer when an entity related to the manager acts as an underwriter for the placement or at any time during the 60-day period after the end of the placement;
- Purchasing or selling securities to another investment Fund managed by the manager or a company in the same group;
- Purchasing or selling debt securities on the secondary market, through related brokers that are main brokers in the Canadian debt securities market (in accordance with an exemption received from the Canadian Securities Administrators);
- Entering into foreign exchange transactions (including both spot transactions and forward transactions) with National Bank of Canada.

The Manager has implemented policies and procedures to make sure that the conditions applicable to each of the above transactions are met. The applicable standing instructions require that these transactions be carried out in accordance with NBII policies, which specify, in particular, that investment decisions pertaining to these related party transactions must be made free from any influence by an entity related to NBII and without taking into account any consideration relevant to an entity related to NBII. Furthermore, the investment decisions must represent the business judgment of the securities advisor, uninfluenced by considerations other than the best interest of the Fund and must achieve a fair and reasonable result for the Fund.

Registered Plan Trust Services

NTC receives a fixed amount per registered account for services provided as trustee for registered plans.

Administrative and Operating Services

The provision of certain services was delegated by the Fund Manager, NBII, to National Bank Trust Inc. ("NBT"), a wholly-owned indirect subsidiary of the Bank. These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

Management Fees

The Fund pays annual management fees to the Fund manager for its management services. The fees are calculated based on a percentage of the Fund's daily net asset value before applicable taxes and are paid on a monthly basis. A portion of the management fees paid by the Fund covers maximum annual trailer fees and sales commissions paid to brokers. The remainder of the management fees primarily covers investment management and general administration services. The breakdown of major services provided in consideration of the management fees, expressed as an approximate percentage of the management fees, is as follows:

Series	Management Fees	Distribution	Others [†]
Investor Series	2.00%	62.50%	37.50%
Advisor Series*			
Front-end load	2.00%	62.50%	37.50%
Back-end load - 1 to 6 years	2.00%	25.00%	75.00%
Back-end load - 7 years and more	2.00%	62.50%	37.50%
Low load - 1 to 3 years	2.00%	25.00%	75.00%
Low load - 4 years and more	2.00%	50.00%	50.00%
Series F	0.75%	—	100.00%

^(†) Includes all costs related to management, investment advisory services, general administration and profit.

^(*) Excluding sales commissions paid on the Advisor Series with the low sales charge option and deferred sales charge option, which are not paid for out of the management fees.

Past Performance

The bar charts indicate the performance for each the Fund's series in existence greater than one year during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, or by June 30, as applicable.

Annual Returns

The bar charts indicate the performance for each series of the Fund (in existence greater than one year) during the years shown, and illustrate how the performance has changed from year to year. They show, in percentage terms, how much an investment made on January 1 (or made commencing from the start of the series) would have grown or decreased by December 31 of that year, or by June 30, as applicable.

^(‡) Returns for the period from May 21, 2014 (commencement of operations) to December 31, 2014.

^(†) Returns for the period from January 1, 2020 to June 30, 2020.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the accounting periods shown.

Investor / Advisor* Series

⁽¹⁾ The Advisor Series was created on June 12, 2009.

Net Assets per Unit⁽¹⁾ Commencement of operations: November 10, 1989

Accounting Period Ended	2020 June 30	2019 December 31	2018 December 31	2017 December 31	2016 December 31	2015 December 31
Net Assets, Beginning of Accounting Period Shown ⁽⁴⁾	34.10	27.44	33.77	34.40	25.27	29.82
Increase (Decrease) from Operations (\$)

Portfolio turnover rate (%) ⁽⁸⁾	20.51	50.27	66.72	90.00	105.17	62.96
Net asset value per unit (\$)	9.54	10.63	8.43	10.23	10.27	7.44

⁽¹⁾ This information is derived from the Fund's Annual Audited Financial Statements and Interim Unaudited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

⁽²⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period. For all series created before 2016, the detailed calculation of the total Increase (Decrease) from Operations as at December 31, 2015 has been adjusted to reflect the proper allocation between the following items: Total revenue, Total expenses, Realized gain (losses) and/or Unrealized gain (losses). It is a non-material correction related to a programming error in the ratio calculation.

⁽³⁾ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

⁽⁴⁾ The net assets are calculated in accordance with IFRS.

⁽⁵⁾ This information is provided as at the last day of the accounting period shown.

⁽⁶⁾ Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.

⁽⁷⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106. Since calculating an average daily allocation of the trading expenses would take considerable effort, an average monthly allocation has been used instead for the accounting periods prior to 2016.

⁽⁸⁾ The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
