Management Discussion of Fund Performance

Investment Objective and Strategies

The NBI International High Conviction Equity Private Portfolio's investment objective is to provide long-term capital growth. The Fund invests directly, or through investments in securities of other mutual funds, in a portfolio comprised primarily of common shares of companies located outside of North America selected using a high conviction investment approach.

The portfolio manager seeks undervalued shares in every sector, and also considers the quality and liquidity of the securities. The portfolio manager relies on its convictions to select securities. In applying this high conviction investment approach, the industry and geographic allocation and the weighting of each security in the portfolio will generally differ significantly from the allocation and weighting in the fund's reference index.

Risks

The global investment risk of the Fund remains as described in the simplified prospectus or any amendments thereto and Fund Facts.

Results of Operations

For the twelve-month period ended December 31, 2022, the NBI International High Conviction Equity Private Portfolio's Advisor Series units returned -15.26% compared to -8.23% for the Fund's benchmark, the MSCI EAFE Index (CAD). Unlike the benchmark, the Fund's performance is calculated after fees and expenses. Please see the *Past Performance* section for the returns of all of the Fund's series, which may vary mainly because of fees and expenses.

Certain series of the Fund, as applicable, may make distributions at a rate determined by the manager. This rate may change from time to time. If the aggregate amount of distributions in such series exceeds the portion of net income and net realized capital gains allocated to such series, the excess will constitute a return of capital. The manager does not believe that the return of capital distributions made by such series of the Fund have a meaningful impact on the Fund's ability to implement its investment strategy or to fulfill its investment objective.

The Fund's net asset value dropped by 10.81% over the period, from \$1.367 billion as at December 31, 2021 to \$1.220 billion as at December 31, 2022. The decline was attributed mainly to market fluctuations.

Financial markets experienced some notable volatility in 2022 as decades-high inflation prompted an unwavering tightening campaign from major central banks and threatened to bring the global economy to a standstill. Both stocks and bonds posted negative, double-digit losses for the year, something not seen in the past 50 years.

Global equity markets endured their worst annual performance since the global financial crisis. Valuations were crushed around the globe as central banks embarked on the most aggressive tightening campaign in decades, which stoked recession risks and weighed on risky assets. The MSCI All Country World tumbled -19.8% in 2022. Regionally, losses were widespread across the globe. The S&P 500 fell -19.4%, the MSCI EAFE lost -16.8%, and the MSCI Emerging Markets index tumbled -22.4%, led by China (-23.6%) given property sector woes and strict Covid lockdowns. Meanwhile, the S&P/TSX outperformed its global peers (-8.7%) given solid performance in the heavyweight commodities space that helped to offset broad based weakness elsewhere.

Indeed, sector compositions largely explained the relative performance of major regional benchmarks last year. The energy sector was by far the strongest performing sector in 2022 and even managed to generate positive, double-digit returns versus negative returns for most other sectors. Elsewhere, defensive-oriented sectors such as consumer stables, gold, and utilities outperformed their cyclical peers (consumer discretionary, financials, technology, and communication services) as risk aversion took hold. Some of these latter sectors are more sensitive to rising interest rates, with global communication services (dominated by Alphabet, Meta, and Tencent), consumer discretionary (Amazon), and "traditional" information technology suffering relatively larger losses as soaring interest rates weighed on the valuations of these longer-duration tech sectors.

Under these circumstances, the Fund underperformed its benchmark. Over the period the fund's relative underperformance was mainly driven by security selection in the Industrials, Information Technology and Consumer Staples sectors, as well as a lack of exposure to the outperforming Energy sector.

Among the top contributors to the fund's performance over the year were Novo-Nordisk and HDFC Bank Limited. Conversely, among the largest detractors to the fund's performance were Taiwan Semiconductor & Keyence.

Recent Developments

During the period the portfolio manager did not exit or initiate any new positions. However, he trimmed positions in Novo-Nordisk, Roche and Commonwealth Bank of Australia while adding to positions in Alcon, Essilor Luxottica, Compagnie Financière Richemont and InterContinental Hotels Group. Moreover, the IHS Markit shares were converted for S&P Global common stock following the completion of the merger between the two organizations. There were no changes to the long-term high-quality bottom-up investment approach.

The portfolio manager remains confident that his bottom-up, original, fundamental research with a focus on very high-quality companies, will continue to provide steady returns over the long term, regardless of the macro environment. The Fund's investment horizon is best measured in years or decades (not months or quarters). The focus continues to be on identifying what are believed to be high quality companies with sustainable competitive advantages and operating in industries with high barriers to entry.

On or around February 1st, 2022, Fiera Capital Corporation retained the services of StonePine Asset Management inc., a firm controlled and led by Nadim Rizk, to delegate its portfolio management functions for the Fund. Fiera Capital Corporation is responsible for the investment advice given by StonePine Asset Management inc.

On April 30, 2022, the Fund's independent review committee (the "IRC") was reduced to three members when Robert Martin resigned as IRC member. On May 1, 2022, the Fund's IRC was increased to four members when Line Deslandes was appointed as IRC member. However, on September 30, 2022, the Fund's IRC was reduced to three members when Line Deslandes resigned as IRC member.

The Manager pays the operating expenses of the Fund other than its "Fund costs" (defined below) (the "variable operating expenses"), in exchange for the Fund's payment to the Manager of annual fixed-rate administration fees with respect to each series of the Fund.

The administration fees are equal to a specified percentage of the net asset value of each series of the Fund, calculated and paid in the same manner as the Fund's management fees. The variable operating expenses payable by the Manager include, but are not limited to: transfer agency and recordkeeping costs; custodial costs; accounting and valuation fees; audit fees and legal fees; costs of preparing and distributing financial reports, simplified prospectuses, annual information forms, Fund Facts, continuous disclosure material and other securityholder communications; and costs of trustee services relating to registered tax plans, as applicable.

In addition to administration fees, the Fund shall also pay certain Fund costs, namely: taxes (including, but not limited to, GST/HST and income taxes); costs of compliance with any changes to existing governmental or regulatory requirements introduced after August 1, 2013; costs of compliance with any new governmental or regulatory requirements, including any new fees introduced after August 1, 2013; interest and borrowing costs; costs related to external services that were not commonly charged in the Canadian mutual fund industry as at August 1, 2013; Independent Review Committee costs, including compensation paid to IRC members, travel expenses, insurance premiums and costs associated with their continuing education; and variable operating expenses incurred outside of the normal course of business of the Fund.

The Manager may, from time to time and at its sole discretion, decide to absorb a portion of a series' management fees, administration fees or Fund costs.

These include accounting, reporting and portfolio valuation services. The fees incurred for these services are paid to NBT by the Fund manager.

Under the *Distribution* heading, expenses include the broker's compensation consisting of the maximum annual trailer fees and sales commissions paid to brokers. Under the *Other* heading, the fees relate mainly to investment management, investment advisory services, general administration and profit.

The management fees paid by the Fund only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the profiles of the NBI Private Wealth Management service ("PWM"). General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM's service fees, which are paid directly by investors. Past performance of a series of a Fund does not necessarily indicate how it will perform in the future.

^(°) For Series N and NR, offered only to investors using the NBI Private Wealth Management service ("PWM"), management fees only cover management of fund investments, i.e. the fees related to management of fund portfolios constituting the PWM profiles. General administration services, trailer fees and sale commissions paid to brokers are covered by the PWM's service fees, which are paid directly by investors.

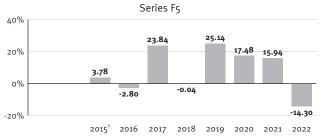

^(**) There are no management fees paid by the Fund with respect to the Series O. Instead, Series O securityholders pay a negociated administration fee directly to National Bank Investments

⁽e) This information is derived from the Fund's Annual Audited Financial Statements. The net assets per unit presented in the financial statements might differ from the net asset value calculated for fund pricing purposes. The differences are explained in the notes to the financial statements.

⁽²⁾ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase or decrease from operations is based on the average number of units outstanding over the accounting period.

 $^{^{}m (3)}$ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

 $^{^{(4)}}$ The net assets are calculated in accordance with IFRS.

 $^{^{(5)}}$ This information is provided as at the last day of the accounting period shown.

⁽⁶⁾ Management expense ratio is based on total expenses including sales taxes for the accounting period indicated (excluding commission, other portfolio transaction costs and withholding taxes) and is expressed as an annualized percentage of daily average net value during the accounting period.

⁽b) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the accounting period. The trading expense ratio includes, if necessary, the trading expenses from its underlying funds, as described in Article 15.2 of Regulation 81-106.

⁽⁸⁾ The Fund's portfolio turnover rate indicates how actively the Fund portfolio's manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the accounting period. The higher a Fund's portfolio turnover rate in an accounting period, the greater the trading costs payable by the Fund in the accounting period, and the greater the chance of an investor receiving taxable capital gains in the accounting period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
